Attachments:	Request for 6 month extension to Assisted Conception Policy v9
---------------------	--

Executive Summary:

In order for the Public Health team to carry out an evidence review on the Assisted Conception policy, an extension to the review date is required.

Implications:

Health/CCG strategic objectives	
Financial/Resource	The CCG seeks to balance clinically appropriate thresholds with potential cost pressures in this area. These are budgeted for but are kept under review.
Legal/compliance	Potential legal challenge to all policies and in individual cases if policy is not fair and consistent.
Equality Analysis	The policy has undergone an EQIA
Patient and Public Engagement	These policies have been developed in conjunction with provider trusts, clinicians, and with public health leadership
Risk (including reputational) and rating	This policy is not on the risk register but could potentially be high risk areas in terms of compliance with NICE guidance and public interest.

Recommendation(s):

(1) TO APPROVE

Next Steps:

Evidence review on the Assisted Conception policy as a whole will be initiated by the Public Health team

Date of paper	March 2018
