

Request for 6 month extension to Assisted Conception Policy v9

The current Assisted Conception policy was due to be updated at the end of February 2018 as part of a rolling review. It was agreed by the Surrey Priorities Committee on 30th January 2018 that a 6 month extension would be applied to the policy in order that the Public Health team can conduct an evidence review of all procedures within it. There have been no new national changes to Assisted Conception processes thus we do not anticipate there being any changes made the policy.

We are asking the Governing Body to agree to the 6 month extension to allow time for Public Health to conduct an evidence review.
